About Vertafore

Vertafore is the leading provider of software, services, and information to the insurance distribution channel including independent agents, brokers, MGAs, carriers, and reinsurers. Vertafore leverages a unique industry presence to deliver meaningful solutions, powerful technology, critical information, and robust insights to help organizations effectively respond to business challenges and capture new opportunities. Vertafore solutions have helped more than 15,000 customers and 200,000 users gain competitive advantage to accelerate their business performance.

Why Vertafore

Vertafore brings together a family of connected technology and information solutions, enabling us to provide clear paths to competitive advantage and growth for all our customers. Vertafore is committed to helping our customers capture opportunities for increasing productivity, efficiency, ROI and growth – unleashing the full potential of their business. Vertafore solutions connect agencies, carriers and MGAs to work together towards a common mission to grow the bottom line and better serve the needs of their clients.

- Deep insurance expertise
- Commitment to client success

Discover how real-time connectivity and download products from vertafore can help carriers and agencies do practically everything faster, smarter and more cost-effectively.

Transit Server is a multi-channel-ready servicing and new business platform for the independent agency channel.

Key Benefit for Carriers

Transit Server is an insurance-specific integration platform that provides powerful industry-wide connectivity to carriers and MGAs. Built on Microsoft's .NET platform as well as the ACORD standards, Transit Server provides seamless integration with all management systems, Applied management systems, numerous comparative rating platforms including SilverPlume PL Rating, and other third-party products including ImageRight and Portal Server. Transit Server can enable all inbound and outbound industry transactions including:

- Policy, billing, claims and loss run inquiries
- Endorsements
- Payment bridge
- Activities and notes
- Quote bridge
- Quote portal
- Document submission
- Book roll processing
- Download (AL3 to XML)

With ever increasing scrutiny on security, Transit Server provides a single, secure and manageable endpoint for your connectivity. The Transit Server security system can perform one-way authorization or mutual authorization. This provides an added level of security over the public internet, essentially establishing a VPN-type connection to each carrier or MGA. Transit Server provides access to over 80 percent of retail agency desktops.
